## EMPLOYMENT HISTORY

### Web Developer, Archdiocese

April - August 2020

Jaro Iloilo

Archdiocese de Jaro, are keeping documents such as, Marriage Certificate, Baptismal Certificate, Death Certificate and Confirmation. As Web developer my core activities are :

- ▶ Building wireframes & prototype design, which were turned into functional and responsive web application
- ▶ Designed and developed user-friendly web application where they can store all the archives data with different category and search into it easily.

### Front-end Engineer, AcadArena

May - August 2021

Iloilo City

AcadArena is the leading organization for Campus Gaming and Esports Education in the Philippines and Southeast Asia. Run by a unique team of seasoned esports natives and non-native professionals, AcadArena ensures that all student gamers are experiencing the best of what campus esports could offer.

### Freelance Developer

January 2019 - Present

Iloilo City

Making Exceptional Web application, depending on the client requirements. Designing and making performance wise also user-friendly web and desktop applications. Designing and making prototypes that will later establish as web or desktop applications
