PROFESSIONAL SUMMARY

Senior full-stack engineer with 6+ years of experience shipping production web platforms, now specializing in agentic engineering and applied AI. Builds Claude Code agent orchestration wired through MCP to Jira, GitHub, and Figma, taking work from ticket to tested, reviewed pull request.

Strong in multi-tenant SaaS, GraphQL APIs (Ruby on Rails, Node.js, Elixir/Phoenix), React/Next.js/TypeScript frontends, and OCR document processing. Experienced in client-facing requirements and delivery, suited to AI Engineer, AI Product Engineer, and Forward Deployed Engineer roles.

CORE SKILLS

- **AI & Agentic Engineering:** Claude Code, multi-agent orchestration, Model Context Protocol (MCP), MCP integrations (Atlassian Jira, GitHub, Figma), custom agent skills and prompts, context engineering, adversarial AI code review, LLM integration, conversational AI, OCR and document processing, image processing
- **Languages:** TypeScript, JavaScript, Python, Ruby, Elixir, SQL
- **Frontend:** React, Next.js, React Native, Piral micro-frontends, Lit, Tailwind CSS, shadcn/ui, Chakra UI, Material UI, styled-components, SCSS
- **Backend & APIs:** Node.js, Ruby on Rails, Elixir/Phoenix, Fastify, Express.js, GraphQL, REST, microservices, multi-tenant SaaS
- **Data:** PostgreSQL, Supabase, Firebase, MySQL, NoSQL, data modeling (ERDs)
- **Cloud & DevOps:** AWS, Google Cloud, Docker, Terraform, GitHub Actions, CI/CD, Netlify Functions, monorepos
- **Testing & Delivery:** Jest, test-driven development (TDD), unit and integration testing, test-coverage standards, Agile/Scrum, Jira, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Emapta Global

Quezon City, Philippines | Apr 2026 – Present

- Full-stack engineer on a multi-tenant PEO platform serving thousands of users, with a focus on AI-driven engineering; built backend services and GraphQL APIs in Ruby on Rails.
- Integrated Claude Code into the development lifecycle, orchestrating agents that plan, build, test, and review code.
- Building agentic orchestration that helps the team one-shot Jira tickets, with agents guided by the company knowledge base and engineering standards.
- Built custom skills and prompts for agentic coding tools, encoding team standards and conventions.
- Implemented multi-tenant-aware, adversarial AI code review that catches issues before they reach production.
- Hardened CI/CD pipelines and enforced test-coverage standards.
- Migrated the frontend to a monorepo and micro-frontend architecture (React, TypeScript, Piral) using TDD.
- Integrated third-party microservices and partnered with Product and Engineering on the platform architecture.

Lead Software Engineer | Find Hope

Geelong, Australia | May 2025 – Apr 2026

- Led adoption of an agentic engineering workflow with Claude Code, orchestrating agents to plan, implement, test, and review features end to end.
- Connected agents to the team's toolchain through MCP servers for Atlassian Jira, GitHub, Figma, and other tools, so agents pulled ticket context, built from Figma designs, and worked through GitHub branches and pull requests.
- Built the agentic orchestration layer for product delivery: project context files, custom commands and skills, and specialized sub-agents for planning, coding, testing, and review.
- Set guardrails for agent-written code with AI-assisted code review, linters, unit tests, and CI/CD gates for staging and production deployments.
- Designed PostgreSQL database architecture and ERDs for scalable, reliable data models.
- Built secure, documented Node.js APIs and turned design prototypes into responsive, high-performance React components.
- Mentored engineers on agentic workflows, resolved complex technical blockers, and coordinated cross-functional feature delivery.

Software Developer | Mashup Garage

Quezon City, Philippines | Mar 2023 – May 2025

Software consultancy in Manila and Melbourne building products for startups and enterprises.

- Built Next.js features from Figma designs, integrated with GraphQL for efficient data fetching.
- Developed GraphQL queries, mutations, and test suites on an Elixir/Phoenix backend.
- Met directly with clients to gather requirements and align new features with business goals.
- Wrote unit and integration tests and maintained GitHub Actions pipelines that gate deployments to staging and production.
- Prioritized Jira tickets and partnered with QA, product managers, and designers on scope, timelines, and edge-case bugs.
- Supported fellow developers by troubleshooting and unblocking technical issues.

Cloud Engineer | Senti AI

Taguig, Philippines | Jun 2022 – Feb 2023

AI company turning manual business processes into AI-supported web and mobile applications.

- Supported sprints and bug fixes for an OCR document-processing platform digitizing 50,000+ files monthly for SM Philippines' BIR Form 2307 reimbursements, used by thousands of staff (Google Cloud, Angular, Express.js, Terraform).
- Updated company-wide engineering templates used by all Senti AI engineers, introducing Fastify (backend), Lit (frontend), and Terraform infrastructure as code.
- Built and tested REST APIs with Fastify for frontend integration.

Earlier Experience

- **Freelance Software Developer**, Iloilo City | Jan 2020 – Jun 2022: built a procurement bidding system on a Firebase NoSQL database with Netlify serverless functions, plus Node.js REST APIs, database schemas, and app prototypes.
- **Full Stack Engineer & Business Development Intern**, Alabaster Technologies Inc., Aklan | Mar – May 2022: built features for TakeoutPH, an Aklan-based food delivery app, with React, Node.js/Express, Tailwind CSS, and Material UI; migrated a MySQL schema to NoSQL.
- **Frontend Developer (Part-time)**, AcadArena, Iloilo City | May – Aug 2021: built responsive Next.js, Tailwind CSS, and Material UI features for a campus esports platform, maintained a React/Firebase app, and integrated REST APIs.
- **Web Developer (Part-time)**, Archdiocese of Jaro, Iloilo City | Apr – Aug 2020: designed and built a searchable digital archive for sacramental records (baptismal, confirmation, marriage, and death certificates).

EDUCATION

Bachelor of Science in Computer Science | Iloilo Science and Technology University (ISAT U), Iloilo City | 2022

- Best Thesis: "Early Detection of Diseases Through Fingernails Using Image Processing"

AWARDS & ACHIEVEMENTS

- ASEAN Data Science Explorers (DSE): 2nd Runner-up, National Finalist
- HackFest 2020: Top 13, theme "Traversing the Filipino New Normal with Technology"
- Programmer of the Year (2018), STI Senior High School, Iloilo City
